Projects

Clothing Design Generation Using Generative AI
SEMESTER-7
A print on demand E-commmerce platform where users can create their own clothing designs as well as customize the available designs on the website using prompts and order the product right away

Eye Testing Using VR
SEMESTER - 5
Created a VR-based eye testing device during a hackathon, enabling users to assess their visual acuity by interacting with displayed letters. The system compared their responses to actual words, providing an approximate eye power estimate.

Money Manager App Using Flutter
Created Money Manager app using Flutter for efficient income and expense tracking. Simplified financial management with customizable categories and detailed transaction history. Enhanced user experience with a user-friendly interface.
